

PROCEDURE FOR ANNOUNCEMENTS OF WASP POSITIONS

1. **Include the following standard text about WASP in the call text that will be published at your university website.**

English text:

Wallenberg AI, Autonomous Systems and Software Program (WASP) is Sweden's largest individual research program ever, a major national initiative for strategically motivated basic research, education and faculty recruitment. The program addresses research on artificial intelligence and autonomous systems acting in collaboration with humans, adapting to their environment through sensors, information and knowledge, and forming intelligent systems-of-systems.

The vision of WASP is excellent research and competence in artificial intelligence, autonomous systems and software for the benefit of Swedish society and industry.

Swedish text:

Wallenberg AI, Autonomous Systems and Software Program, WASP, är Sveriges största enskilda forskningsprogram i modern tid. Programmet skapar en plattform för akademisk forskning och utbildning i nära samarbete med ledande svensk teknikintensiv industri. Forskningen innefattar artificiell intelligens och autonoma system som verkar i samarbete med mänskliga och som anpassar sig till sin omgivning med hjälp av sensorer, information och kunskap och skapar intelligenta system av system.

WASPs vision är excellent forskning och kompetens inom artificiell intelligens, autonoma system och mjukvara till gagn för Sveriges industri och samhälle.

FOR PhD POSITIONS, PLEASE ALSO INCLUDE THE FOLLOWING TEXT:

English text:

The graduate school within WASP is dedicated to provide the skills needed to analyze, develop, and contribute to the interdisciplinary area of artificial intelligence, autonomous systems and software. Through an ambitious program with research visits, partner universities, and visiting lecturers, the graduate school actively supports forming a strong multi-disciplinary and international professional network between PhD-students, researchers and industry.

Swedish text:

Forskarskolan inom WASP har som mål att förse framtidens forskare med nödvändig kunskap för att kunna analysera, utveckla och bidra aktivt till den tvärvetenskapliga utvecklingen av artificiell intelligens, autonoma system och mjukvara. Genom ett ambitiöst program med forskningsbesök, partneruniversitet och gästföreläsare stöder forskarskolan aktivt bildandet av ett starkt multidisciplinärt och internationellt professionellt nätverk mellan doktorander, forskare och industri.

Forskarskolan erbjuder därmed en unik möjlighet för de studenter som lockas av internationell forskning i världsklass med industriell relevans.
